

SN V16.0: Overview

June 2014

**ALWAYS
LEARNING**

V 16.0 Highlights

IIS

- New strong password policy settings to enforce that a user's password meets the required level of strength.
- Account lockout functionality that will lock a user's account after a specified number of unsuccessful sign in attempts.
- New System Requirements link added to the footer of the home page

IMS

- State, District and Region benchmark tests can now be marked as restricted which will prevent teachers from viewing the test content until the test start date.
- Schoolnet authored assessments can be exported using QTI 2.1
- American Sign language can now be set for the assessment item question and response language.
- A Lexile Type can now be set for a passage.
- A district user can now search and share approved items, with other Schoolnet user types, as a single operation.
- Answer sheets can now be generated and grouped by either alphabetical order or by section
- New configuration option to show student score upon test submission
- Updated ScanIt user interface as well as the answer sheet and image recognition logic
- Download Assessment Results
- Upload Summary Statistics (Scale Score & Grade Equivalent)
- Unsaved Data Warning on Scoring Page

Instructional Improvement System

Strong user account password settings

- Allows system operators to configure and enforce strong password policies for their users helping to increase system security.
- The following strong password settings can be defined ensuring users password meet a basic level of strength.
 - Minimum password length [Default 8] – ensures that each user's password contain a minimum specified number of characters.
 - Minimum number of special characters [Default 2] – forces a user to include a minimum number of special characters (!@#\$%^&*() +{}|"/?:><.,/:'[]\-= '~)
 - Maximum number of repeat characters [Default 3] – The maximum number of times a character can be consecutively used.
 - Password age limit [Default 31 days] – will force the user to reset their password after the specified number of days has past.
 - Password reuse count [default 5] – will not allow a user to use their password again until a specified number of passwords have been defined.\

NOTE: Affects all user accounts, except for parent and student type accounts, not managed by an external authentication provider.

Password policy settings do not apply to student and parent accounts.

Password Rules

Password Rules

Your password must have
7 or more characters,
3 or more special characters,
no more than 4 of the same character in a row,
and be different from your last 2 passwords.

Account lockout after unsuccessful sign in attempts

- To help alleviate user accounts from being hacked from a brute force attack, accounts will become locked after a specified number of unsuccessful sign in attempts. These locked accounts can either be unlocked via a system administrator, or if enabled, will automatically become unlocked after a specified amount of time.
- The account lockout functionality needs to be enabled. Once enabled the number of unsuccessful sign in attempts before lockout can be defined.
- Administrators can enable the automatic unlock functionality and then define the number of hours an accounts should remain locked.
- User Administrators can manually unlock an account through the user management section.

System Requirements link added to the footer of our home page

- As our system requirements are constantly changing due to technology improvements, there was a need to centralize the location of where our users can access and view them
- New “System Requirements” link added to the footer for users to click on and view the latest requirements
- Easy for our Technical Writers to update

PEARSON

ALWAYS LEARNING

System Requirements

This document outlines the non-functional requirements of the Schoolnet web-based platform, as well as requirements of support Schoolnet desktop applications. This includes platform and browser requirements, scanner compatibility information, recommended clicker models, and details and assurances around security, disaster recovery, and reliability. Please note that Pearson reserves the right to adjust these requirements as needed over time.

Schoolnet Web Client Requirements

Hardware Requirements

The Schoolnet web application requires the following minimum platform specifications for workstations.

Schoolnet Web Client Minimum Hardware Requirements	
Processor/Computer	1.0 GHz or faster 32-bit (x86) -or- 64-bit (x64) processor (Please review <i>ScanIt</i> requirements for specific 64-bit details)

Instructional Management System

Benchmark Test Restriction

- Assessment administrators can prevent teachers from viewing the contents of an assigned test prior to the test start date by using a new “Restrict Teacher Access” test setting.
- A new test property will restrict all teachers from viewing a scheduled test’s item content and associated resources until the test start date.
- Test booklets and answer sheets cannot be printed until the test start date.
- Students cannot access a restricted test online before the start date, regardless of the test’s online test student access settings.
- The section information and teacher name does not print on generated answer sheets or answer sheet cover pages.

The screenshot displays the 'Create: Manual Test' interface. On the left, the 'Test Properties' section includes fields for Test Name*, Subject*, Grade Level*, Number of Items, Institution Source, Test Category, and Score Type. The 'Test Category' dropdown is set to 'District Benchmark', and the 'Restrict Teacher Access' checkbox is checked. On the right, the 'Test Stage' section shows a progress bar with stages: Private Draft, Public Draft, Ready To Schedule, Scheduled, In Progress, and Completed. Below this, a message states: 'You do not have permission to see the test content until the test start date: 06/09/2014'. An arrow points from this message to a callout box that reads: 'Teachers are unable to view the test content, no matter the other operations that they have been assigned.'

Export Assessments

This enhancement provides you with the ability to export Schoolnet authored assessments using QTI 2.1.

Key features and capabilities:

A user with the appropriate permission (*"Export an item or test from Schoolnet"*) can export Schoolnet authored assessments.

	The Unsure Visit	
	The passage below is a student's first draft. It may contain errors.	Passage Title The Unsure Visit
	(1)Lilly woke up as the car bumped along the gravel road. (2)As she stretched her arms,	Associated With 4 Questions

American Sign Language

This enhancement provides you with the ability to set the Question Language and the Response Language for an assessment item to American Sign Language, and be able to easily search for these items. In addition, Shoolnet's QTI Import and Export has been enhanced to support American Sign Language.

Key features and capabilities:

Users can search for and create or import/export assessment items for American Sign Language.

Item Central: Create New Item

Item Properties

Subject	<input type="text" value="- Choose a subject -"/>
Grade Level	<input type="text" value=""/> to <input type="text" value=""/>
Question Language	<input type="text" value="American Sign Language"/>
Response Language	<input type="text" value="American Sign Language"/>

Passage Lexile

This enhancement provides you with the ability to set the Lexile Type for a passage. In addition, Schoolnet's QTI Import and Export has been enhanced to support the Lexile Type and the Lexile Code.

Key features and capabilities:

Users can search for and create or import/export passage Lexile values.

Valid Lexile Codes are between 0 and 1900

Valid Lexile Types include:

- AD: Adult Directed
- NC: Non-Conforming
- HL: High-Low
- IG: Illustrated Guide
- GN: Graphic Novel
- BR: Beginning Reading
- NP: Non-Prose

Item Bulk Share

Schoolnet has been enhanced to provide a District user with a quick way to search for and share approved items, with other Schoolnet user types, as a single operation.

Key features and capabilities:

District users are able to quickly search for items that they have permission to edit and share them with other users in a bulk way rather than one-by-one, thus enhancing the user experience.

Both items that have been previously shared as well as items that have never been shared can be selected and updated using the new bulk share operation.

The screenshot displays the 'Item Central' interface. At the top, it shows 'Item Search Results (393)' with a search bar containing 'Equella'. Below the search bar, there are buttons for 'Select All', 'Clear', 'Share', and 'Add Items to Test'. A dropdown menu is open under the 'Share' button, showing options: 'Share selected items' and 'Share all search result items'. The main content area shows a list of search results, with the first item being a 'Multiple Choice' question about Shakespeare's 'As You Like It'. To the right of the item list, there are filters for 'Subject', 'Grade Level', 'Question Language', and 'Standard'. A 'Share Items' modal is open on the right side of the screen. The modal has a title 'Share Items' and a close button. It contains a description: 'Items in the Item Central are available for searching and adding to tests by appropriately permissioned users.' Below this, there are two radio button options: 'Only to Me' and 'Share with Others'. The 'Share with Others' option is selected. Under 'Share with Others', there is a section 'Make this item viewable by the following user types:' with several radio button options: 'State Item Admins Only', 'State and District Item Admins', 'State, District, and Regional Item Admins', 'State, District, Regional, and School Item Admins', and 'Everyone (State, District, Regional, and School Item Admins, Teachers)'. At the bottom of the modal, there are 'Cancel' and 'Save' buttons.

System Performance

- Significant architectural improvements
 - Students submitting tests via the online test tunnel
 - Saving and submitting process was enhanced to accommodate larger number of students submitting data
 - Results might not appear instantly
 - Now being saved and processed on a first come first serve basis
 - Searching for Materials, Items and Passages
 - Performance was enhanced to reduce to the time it takes to display results to the user

Answer Sheet Generator Enhancement

- Ability to generate answer sheets and group by either alphabetical order or by section
 - On the School/Grade tab, defaults to group by alphabetical order
 - Works the same way for the school/grade view and the school view by student
 - Messaging improved
 - Generate Blank Answer Sheet link turned into button

Configuration added for showing student scores upon test submission

- Some clients don't want the results appearing for students immediately when they submit a test online because if there are open response questions, the score is not accurate
- They have to remember to uncheck the "show student scores upon test submission" option each time they schedule a test to disable it
- New top level admin configuration added to allow easy one time setting (enabled by default)
- Unchecking the checkbox on the System – Online Testing page will uncheck the checkbox by default on the schedule page

System: Assessment Admin Settings

Benchmark Score Groups | Data Collection and Monitoring | Counts | Testing Subjects | Test Properties | Item Properties | Custom Description | **Online Testing** | Adaptive Testing | ScanIt Form Definitions | C

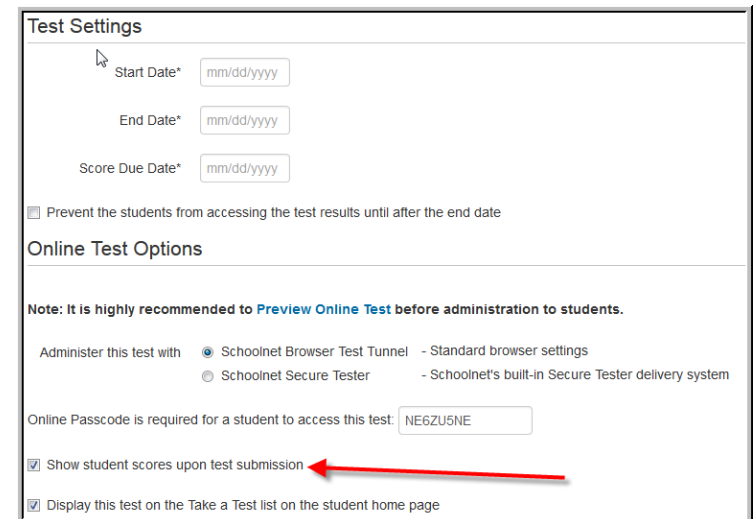

Online Testing

Select the checkbox to activate online testing.

☒ Online testing enabled

☒ Show student scores upon test submission enabled

Save

Test Settings

Start Date* mm/dd/yyyy

End Date* mm/dd/yyyy

Score Due Date* mm/dd/yyyy

☐ Prevent the students from accessing the test results until after the end date

Online Test Options

Note: It is highly recommended to [Preview Online Test](#) before administration to students.

Administer this test with ☒ Schoolnet Browser Test Tunnel - Standard browser settings
☐ Schoolnet Secure Tester - Schoolnet's built-in Secure Tester delivery system

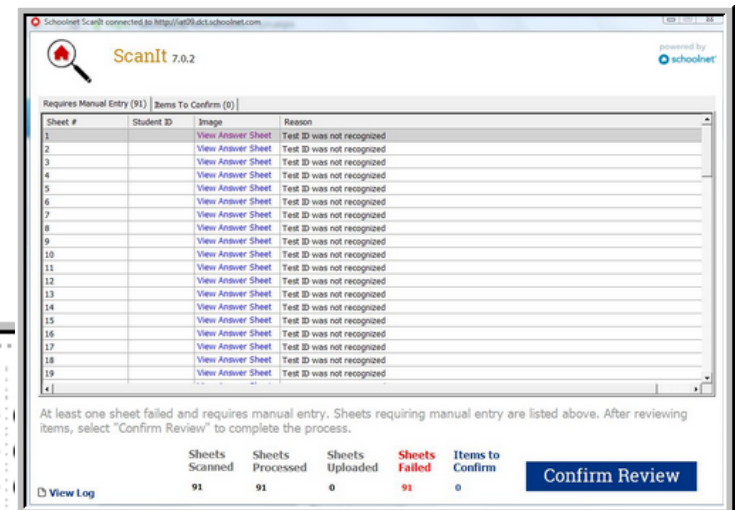

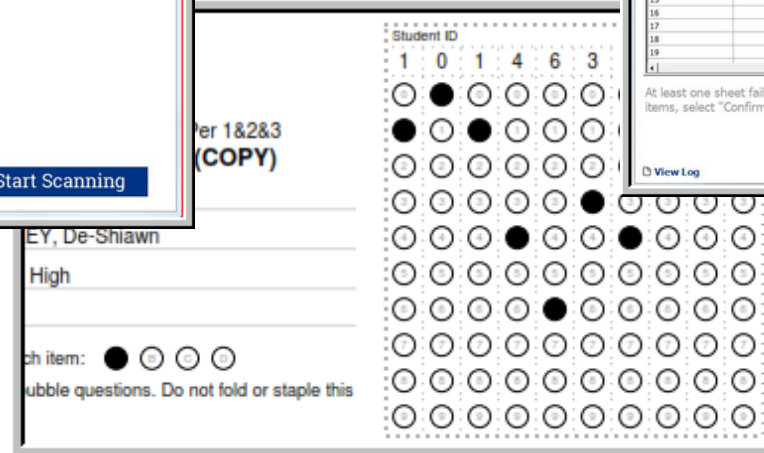

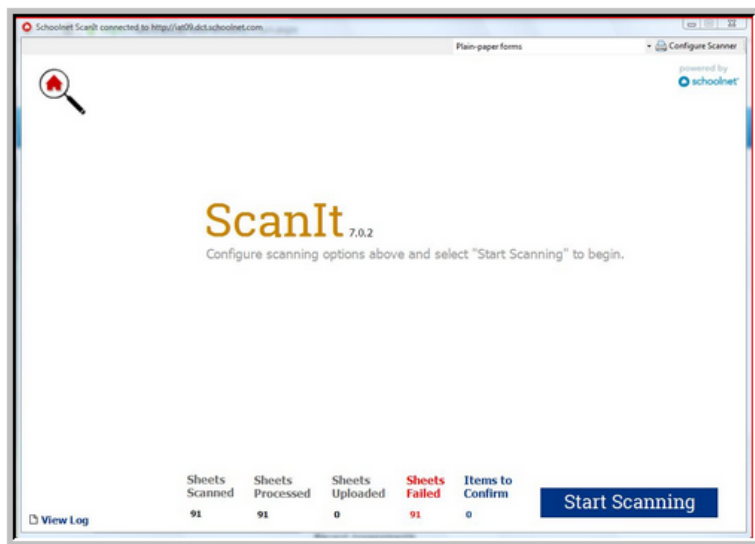

Online Passcode is required for a student to access this test: NE6ZU5NE

☒ Show student scores upon test submission

☒ Display this test on the Take a Test list on the student home page

Updated ScanIt user interface as well as the answer sheet and image recognition logic

- Interface has been simplified to improve usability (Version 7.0.2) – Compatible with answer sheets created in Schoolnet 15.4
- Student ID and Barcode reading logic has been improved to reduce errors
- Student ID bubbles are now printed with black bubbles (rather than the lighter bubbles that mimic pencil marks)

Download Assessment Results

- Hosting can enable / disable the feature
 - Set System → General Settings → Config → Schoolnet.Applications.Assess → DownloadResultsAndUploadStatsEnabled to TRUE
 - Setting is FALSE by default

IMS Minor Enhancements

- To remove the ambiguity that users experienced while reading a temporary password or test passcode, the generators have been updated to no longer include the letters "l", "I" and "O" and the numbers "1" and "0".
- The "Cancel" button was added to the "Create Manual Test" page when a test is copied
- On the Score page, answers for matching items can now be selected by clicking a button (like with multiple choice) rather than selecting an answer choice from a drop-down list.
- The placement of the button to add passages to a test items has been moved to match its location on Create/Edit Open Response item page
- Teachers without additional Assessment Admin rights can choose to co-author a created item upon save
- To prevent scorers from losing their work while scoring a test on the teacher scoring page, the marker will now be asked for confirmation before they are allowed to navigate away from the page when Schoolnet detects that test scores were added or changed.
- 'Standards Mapping' feature has been removed until it can be updated for use with current browser versions
